

## Environmental Statistics: Water and effluent discharge

Mears Group Plc recognises and is fully committed to reduce its impact on the environment. The nature of the business and services delivered by Mears Group Plc identifies the impact as minimal, in respect of climate change, pollution and resources, through water usage and effluent discharge.

Despite minimal exposure, we recognise small adjustments and commitments can help the bigger Global efforts, within the agenda of climate change, pollution and resources awareness and positive change.

Mears Group Plc takes a proactive approach to accreditation continuous improvement to support climate change knowledge and industry improvements.

To support this 12 members of the group are full members of the Institute of Environmental Management & Assessment (IEMA). We also have a number of colleagues at each of our branches trained in CIWM.

Our water/Effluent discharge is only through our offices and on site colleagues. Mears Group Plc does not release water by any other source.

Water Usage and Conservation Policy ensures we only use the water we need and reuse water where possible.

<b>Housing Branches</b> (Average per branch)	<b>Care Branches</b> (Average per branch)
2015 - 240 m3	2015 - 82 m3
2016 - 175 m3	2016 - 74 m3
2017 - 193 m3	2017 - 79 m3
2018 - 271 m3	2018 - 92 m3
